- 500 lbs. Patient Weight Capacity
- **4 Year Warranty**

6" ADJUSTABLE T-RAIL CLAMP

The adjustable T-Rail clamp is available for an additional charge and can be positioned along the grooved table top edge. Clamp is also removable.

### PRODUCT SPECS

PATIENT WEIGHT CAPACITY	500 lb. (227kg.)
CARBON FIBER TOP	22" x 84" (56cm x 213cm)
MOTION 1	height range 26" - 44" (66cm x 112cm)
MOTION 2	10" (12cm) Longitudinal Travel
MOTION 3	Trendelenburg tilt +/- 12°/15°
MOTION 4	lateral tilt +/- 15°
CONTROLS	1 foot (motion 1), 1 hand (motion 2 thru 4)
TABLE WEIGHT	498 lbs. (226 kg.)
WARRANTY	· Frame, Understructure, Upholstery, and Padding - 4 years · Electrical & moving parts - 3 years parts, 1 year labor
CERTIFICATIONS	FDA listed, cETL approved, CE marked

#### INCLUDED ACCESSORIES:

##### Patient Safety Strap

Adjustable Velcro® strap to help immobilize the patient during anesthesia and surgery.

##### 1" Radiolucent Table top pad (2" pad is optional)

##### 3 Cranial Positioning Pads

The three pads provide versatile support in supine and prone positions.

- 2" (5 cm) thick x 12" (31 cm) (square)
- 4" (10 cm) thick x 12" (31 cm) (square)
- Crescent face rest pad

C-ARM IMAGING TABLES

# CFPM400

## 4 Movement Table Features

The OAKWORKS® CFPM400 C-Arm Imaging Table is the most cost effective solution for a 4 movement imaging table in the mobile imaging table market. Incorporating OAKWORKS® brand reputation for quality & reliability, the CFPM400 is designed to accommodate mobile c-arm and ceiling suspended imaging systems. It's dynamic height range of 26" to 44" accommodates low height patient wheelchair transfers to maximum height c-arm requirements for full lateral imaging. Mounted on a low profile base, this mobile table can be secured via independantly locking casters and provides 56" of metal free imaging area. The CFPM400 is FDA listed, cETL approved and CE marked.

*Motion 1*

HEIGHT RANGE 26" - 44"

*Motion 3*

TRENDELENBURG TILT +12°/-15°

*Motion 2*

LONGITUDINAL TRAVEL 10"

*Motion 4*

LATERAL TILT +/- 15°

### RECTANGULAR TOP OPTION

The rectangular top is wider and shorter (24"x80", 61 cm-203 cm) than the integrated headrest top providing greater flexibility to customize the configuration of our imaging tables to better meet the patient positioning needs of any medical imaging facility.

*The three cranial positioning pads are not included with this option.*

- Best Adjustable Height Range  
**22" - 40" Industry Lowest**
- 56" Metal Free Imaging Space
- 500 lb. Patient Weight Capacity
- **4 Year Warranty**

The OAKWORKS® CFPM100 C-Arm Imaging Table uses our robust single tower lift system to create this 500 lbs patient weight capacity table. This cost effective 22" x 84" carbon fiber table is ideal for large patient care in pain management practices, surgical centers, and other multi-disciplinary medical facilities that do not require 2, 3 or 4 table movements. The 22" - 40" adjustable electric height range is the lowest in the mobile imaging table market and promotes safe and secure wheelchair transfer. Accessories included: 1" radiolucent table top pad (2" pad is optional), 1 crescent face pad, 2 supine cranial pads and 1 padded safety strap. See page 1 for pad and strap descriptions.

The Oakworks® CFPMFXH Fixed Height C-Arm Imaging Table incorporates Oakworks brand reputation for high quality and reliability into this cost effective table designed to accommodate mobile and ceiling suspended C-Arm systems. The CFPMFXH is offered in a standard height of 37" with custom height options available in one inch increments from 31" to 36". This mobile c-arm imaging table has a 500lbs patient weight capacity and provides all of the basic features required for successful pain management image-guided procedures. The integrated head rest carbon fiber top features a 56"(142cm) metal free imaging area for maximum C-Arm efficiency. The table is mounted on a low profile base and can be moved easily from room to room and secured with 4 locking casters. Included with every table are a 1" radiolucent table top pad (2" pad is optional), 1 crescent face rest pad, and 2 supine cranial pads. See page 1 for pad descriptions.

C-ARM IMAGING TABLES

## ACCESSORIES

IN STOCK PRODUCT

Visit [www.oakworksmed.com](http://www.oakworksmed.com) for pricing.

## CARBON FIBER ARM BOARD

- **180° range of motion**
- Compatible with all tables
- Requires no mounting or attachment hardware - slides under table top pad
- Compatible with any model Fluoroscopy Table
- Folds together for safe and compact storage

The OAKWORKS® Carbon fiber arm board is fully radiolucent with a 180° range of motion. The arm board requires no mounting or attachment hardware and simply slides under the table top pad. This product can be used on any fluoroscopy table and can support arms and feet in a variety of positioning configurations. This unique design allows the product to be folded together for safe and compact storage when not in use.

## FLUORO EXTENDER

- **Made of radiolucent, polycarbonate material**
- Organic shape is conducive to a variety of table placement applications
- 30" long x 23.5" wide x 1/4" thick
- Can be used with any fluoroscopy table
- Inserts under the table top pad

The OAKWORKS® Fluoro Extender is radiolucent and offers extra width only where you need it for greater positioning accuracy with optimum imaging. The Fluoro Extender is inserted under the table top pad. This optional accessory can be used with any Fluoroscopy Table.

## ARM HAMMOCK

- **Easily attached to the Integrated Head Rest**
- Works for people ranging from 5' to 7' tall

Offer your patients optimal comfort without spending a fortune. This unique product will comfortably and easily support your patient's arms when faced down in the prone position. Eliminate altogether, the awkward feeling your patients may experience by not knowing where to place their arms.

## PATIENT SAFETY STRAP

- **Easily adjusted and repositioned with Velcro®**
- Durable radiolucent material

The Patient Safety Strap helps eliminate unwanted patient movement and injury during surgical procedures. The strap is easily adjusted to accommodate a variety of patient sizes. It is made of a durable, radiolucent material that is designed for long-wearing use.

## SIDE LYING POSITIONING SYSTEM

- 6 Piece System: Head Rest, Torso Cushion, Pillow, Adjuster Wedge, Leg Cushion, Strap

No other system on the market is designed specifically to create ergonomically correct support for side lying positions. In development for almost a year with the help of top pregnancy instructors who are very focused on correctly positioning people in the most comfortable way, every detail was considered. Each pad has unique features that insure that the client is properly supported and fits a wide range of body types and sizes. The system also offers the flexibility to be used as a backrest and a seated support. Available in any TerraTouch color.

## OAKWORKS® PRONE PILLOW

Prone Position

Supine Position

- Soft contact surfaces offer exceptional support
- Design has large vent areas for easy breathing
- **Low profile reduces cervical extension/flexion**

The OAKWORKS® Prone Pillow is an affordable radiolucent solution for both simple prone and supine patient positioning as well as advanced positioning for hi-tech imaging applications. This patented pillow is ideal for basic cranial positioning and contains no metal, making it fully compatible with c-arm imaging systems, CT imaging systems and MRI systems. Oakworks' advanced lower profile design reduces excessive cervical extension/flexion while the resilient platform provides the optimal support needed to ensure your patient stays comfortable, still and compliant throughout treatment. Available in TerraTouch Coal or Heron only.

## BUTTERFLY CUSHION

- **Great for prone breast, lumbar and neck support**
- Allows adjustments of up to 3" in height while the patient is on the table.

This unique bolster inflates to just the right size to provide support and positioning in specific areas of the body. A great addition to the Spine Positioning System, this bolster can ease tender breasts, sore necks and lumbar aches. Designed with dual air chambers to adjust for clients' comfort levels, the air bladders fill to just the right size and shape to meet each client's needs for support and stretch. Use two for simultaneous neck and lumbar support.

*"The Spine Positioning System solves imaging, stability and comfort issues associated with performance of spine procedures. The cervical and thoracic spine*

*including the cervicothoracic junction can now be visualized in AP, oblique and lateral projections regardless of the patient's body habitus. All posterior approach spine procedures can now be accurately performed as visualization of the necessary anatomic landmarks is possible due to the unique design of the Spine Positioning System."*

PAIN MANAGEMENT POSITIONING

# SPINE POSITIONING SYSTEM

## IN STOCK PRODUCT

Visit [www.oakworksmed.com](http://www.oakworksmed.com) for pricing.

The Spine Positioning System is an integral component of the pain management fluoroscopy suite. With this system, procedural set up time is reduced, patient comfort is enhanced, and unwanted movement is minimized. Most importantly, the target anatomy is more readily visualized, which allows the physician to perform spine procedures in a more efficient and secure manner.

OAKWORKS® designed the Spine Positioning System in an effort to achieve the critical balance between optimal imaging and patient comfort. The radiolucent adjustable frame and versatile padding system provide a metal-free imaging support platform capable of quickly positioning a wide variety of patient physiques. The adjustable face rest position provides individualized positioning for all types of cervical procedures and anatomy. The contoured torso support pad is complimented by a host of uniquely shaped and sized adjuster pads and wedges that enable a multitude of positioning combinations for ideal patient comfort and imaging needs for all spinal column procedures.

The Spine Positioning System was designed with the input of experienced interventional spine physicians under the direction of Paul Dreyfuss, MD. An extensive trial period was undertaken such that various modifications were made to accommodate the precise needs of the interventional pain physician and their patients.

## PRIMARY ADVANTAGES OF THE SPINE POSITIONING SYSTEM:

- No metal (radiopaque) components are present under the spine- unobstructed visibility of the entire spine from C0-C1 to the coccyx with all imaging angles (AP, oblique and lateral). All radiopaque components are placed proximal to the forehead.
- Adjustment easily made to maximize opening and imaging of the cervico-thoracic junction.
- Secure and easy to use single locking face rest mechanism to adjust cervical flexion, extension and height.
- Torso pad elevation under the chest allows for the shoulders to drop out of the plane of imaging when obtaining a lower cervical and upper thoracic lateral and oblique views.
- Adequate free space under open air face section for aeration, supplemental O<sub>2</sub>, jaw/face contact as necessary; prevents patient overheating and easy communication with the patient without sound muffling.
- Contoured torso support allows the shoulders to drop yet be adducted/slightly extended next to the body for comfort where they are also less likely to lose position/fall off the fluoroscopic table.
- Current design obviates the need to pull the arms back to the side to obtain imaging of the cervico-thoracic junction; the more comfortable adducted and slightly extended position suffices.
- Adequate adjuster pads to maximize torso build up for larger frame patients.
- Not only for cervical cases; also useful for thoracic and lumbar cases.
- Comfortable for patients with cervical pain when longer duration thoracic and lumbar cases are performed.
- Softer foam under the breasts and shoulders for comfort; firmer central foam for enhanced stability.
- Wider and longer torso pad gives extra support resulting in less sway and improved patient comfort.
- Torso pad with abdominal recess for extra comfort and support.
- All prone positioning needs met with the SPS; no need for additional pillows.
- Very firm adjuster wedges prevent undue compression and loss of the original position.

THE FOLLOWING SCENARIOS IN FACTITIOUS PATIENTS WILL DEMONSTRATE:

- Various body types using the Spine Positioning System
- Their positioning and specific configurations of the Spine Positioning System used in particular clinical situations
- Various fluoroscopic images of these factitious patients that exemplify the value of the Spine Positioning system

**PATIENT - LIZ**

ULTRASOUND TABLES

# FEATURES · OPTIONS · ACCESSORIES

## ADJUSTABLE ACCESS BACK SUPPORT

Adjustable back support with locking angles for optimal positioning of the patient. Easily adjustable with one hand.

*Left & right sides available. See page 18 for details.  
Right side is standard on Oakworks Echocardiography table.*

## RETRACTABLE FOOT RESTS

Adjust the foot rests to a wide range of angles and lengths to accommodate any patient or procedure. Store inside the table out of the way when not in use.

*See page 18 for availability.*

## T-RAIL ADAPTER

Can be attached at any designated location on the table, allowing the use of any t-rail attachable accessory.

*Available on any Oakworks Ultrasound table.*

*Clamp & pole not included.*

## DETACHABLE ARM BOARD

This product can be used on any of Oakworks ultrasound tables with a T-Rail Adapter and can support a variety of positioning configurations.

## SLIDING CARDIO PANEL

The sliding cardio panel allows you to adjust the opening to the size you need, up to 15" (38 cm). Great for left or right handed scanning.

Available in manual or electric adjustment options.

*Manual version is standard on Oakworks Echocardiography table; optional on Multi-Specialty, Women's Imaging, and Vascular table with Fowler. Electric adjustment (available on select tables) is an additional charge.*

*Available on 30" width tables only.*

## ACCESSORY MOUNTING PLATE

Add a face rest or table extender to your table with the accessory mounting plate.

*Available on the fowler end only of 3 section tops.*

*Available on either or both ends of the 2 section fowler or rectangular ultrasound tables.*

## QUICK LOCK HEAD REST & PAD

Fully adjustable, the double articulating frame ensures a perfect fit for any treatment. Helps to position the head and neck during treatment.

*Available for any table with an Accessory Mounting Plate.*

## TABLE EXTENDER

Lengthens the table by 12" allowing for access to the patient's neck for carotid artery exams and thyroid exams.

*Available for any table with an Accessory Mounting Plate.*

## SIDE RAILS

Increase stability and security for your clients with a set of side rails. Easily tuck out of the way when not in use.

*Standard feature on Oakworks Vascular tables.  
Optional on all other Oakworks Ultrasound tables.*

## CENTRAL BASE LOCKING SYSTEM

Easily secure your table into place with the central base locking system. Safely unlock the system to move your table with ease.

*Standard feature on the Multi-Specialty table.  
Optional on all other Oakworks Ultrasound tables.*

## PAPER ROLL HOLDER

The unique paper roll holder features the ability to fold it out of the way when not in use. It is a standard feature on every table. *Paper not included.*

## FOOT CONTROLS

### HEIGHT ONLY

Select the foot control that will control the height range of your table.

### HEIGHT & FOWLER

Select the foot control that will control the height range as well as the electric fowler of your table.

*See page 18 & 24 for availability.*
