This symbol, when used in this manual and on product labels, represents a caution warning. Be sure to read and comply with all precautions and warnings.

This symbol, when used in this manual and on product labels, warns against an electrical shock hazard. Be sure to observe and comply with all warnings.

This symbol, when used in this manual or on product labels, indicates a Protective Earth (Ground) Terminal.

This symbol when used in this manual or on product labels, warns that during transport there should be no stacking of containers.

This symbol, when used in this manual or on product labels, indicates that the product should be protected from moisture. The humidity specifications for Transport & Storage are listed in the back of this manual.

This symbol, when used in this manual or on product labels, indicates that information is given regarding the recommended temperature limits during transport and storing.

This symbol, when used in this manual or on product labels, indicates the date of manufacture of the device.

This symbol, when used in this manual or on product labels, indicates alternating current (AC).

This symbol, when used in this manual or on product labels, indicates direct current (DC).

This symbol, when used in this manual or on product labels, indicates that instructional information is included. It should be read carefully and completely.

Improper use of this device can cause injury. Be sure to read all operating instructions prior to use.

Weight limit is defined by the portable table used with this product. (If the portable table has a weight limit of 450 lbs, then the system is 450 lbs) up to a maximum of 550 lbs.

Be certain that the table is completely lowered prior to discharging an ambulatory patient. The patient may lose balance and fall.

Electrical Shock Hazard. The power supply/control module is located below the base of the table. No user serviceable parts are inside. Refer servicing to qualified personnel. Before doing any work on the unit or cleaning with any liquid cleaner, unplug wall connector prior to contact with any cables connected to the power supply.

Plug table into an outlet that is surge protected to a level of 750J or higher. Failure to do this may void all or part of the warranty.
GROUNDING INSTRUCTIONS

This product must be grounded. If it should malfunction or breakdown, grounding provides a path of least resistance for electrical current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. See U.S. sample below.

This product is manufactured for use on a nominal 120-volt circuit for the United States and a nominal 220-volt circuit for use in Europe. The plug has a grounding pin in a pattern that varies by country as shown in the Product Identification section of this manual. Make sure that the product is connected to an outlet having the same configuration as the plug.

DANGER- Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service man if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product - if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

To reduce the risk of electric shock, this furnishing has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

No adapter should be used with this product.
**PRODUCT DESCRIPTION**

- **wheels (2)**
- **knobs (4)**
- **End bumper of portable table support**
- **Adjustable portable table supports (2 sets)**
- **End bumper of portable table support**
- **Center alignment groove**
- **Portable table secure strap**
- **Strap cleat**
- **Hook behind the cleat**

**TABLE SPECIFICATIONS**

- **Height Range:** 20” - 36”
- **Width:** fits portable tables 27” - 33” wide
- **Lift Capacity:** Weight limit is defined by the portable table used with this product. (If the portable table has a weight limit of 450 lbs, then the system is 450 lbs) up to a maximum of 550 lbs.
- **Top:** works with rectangular, round corner, or backrest portable tables
- **Electronics:** 120v or 220v electric motor
  (1) low voltage hand control or
  (1) low voltage foot control
BEGIN PREPARE \n
ONE TIME ONLY PROLUXE CONVERTIBLE SET-UP

This is a one time only procedure for each given portable table.

\section*{STEP 1}
Loosen all knobs below the adjustable portable table supports by turning the knob counter-clockwise.

\section*{STEP 2}
Slide the adjustable portable table supports to their widest position.

\section*{STEP 3}
Remove the portable table secure strap from the strap cleat (if necessary).

\section*{STEP 4}
Plug in the Convertible and lower to its lowest height.
STEP 5
Open your portable table on its side.

STEP 6
Remove the shiatsu cables or bolts on one side to enable your table to lay flat. There are different types of shiatsu cables. Follow the directions below based on the type you have. Or follow your table manufacturer’s instructions.

CAUTION
Follow your table manufacturer’s instructions for using the Shiatu option if your table has them. The instructions shown here are for general reference only.

WING NUT
Repeat these steps on both sides of the table. Locations shown above.
Remove the wing nut  Remove wood brace  Remove cable  Replace wood brace and wing nut

C-CLAMP
Repeat these steps on both C-Clamps.
C-Clamp closed  Open C-Clamp  Remove Shiatu cable  Close C-Clamp

NOTE: Some systems may be slightly different such as; cable not between braces, hex nut instead of wing nut. You may need to use a wrench to remove the bolt.
STEP 6
With your ProLuxe Convertible at its lowest height, stand at the side where the portable table supports are towards the outside, as shown here.

Have the widest side of the adjustable portable table supports facing you.

STEP 7
Load your portable table

A
Lift your portable table onto the ProLuxe Convertible base.

B
Open your portable table so that it is flat and position the bottom away from you.

C
Lower your portable table onto the ProLuxe Convertible base.

CAUTION
Be sure to read and follow the directions on how to center & secure your portable table (shown on page 7) before use.
STEP 8
Once your portable table is on the ProLuxe Convertible, you are ready to align & secure it to the base.

A
Align the hinge of the portable table over the center alignment groove.

B
Visually center the portable table with the base of the ProLuxe Convertible on both ends.

C
Be sure that the knobs are loose so you can adjust the table supports.

D
Keeping the portable table centered, push the adjustable table supports together against the sides of your portable table.
Once the table supports are snug against the sides of the portable table, tighten the knobs to secure into place.

**NOTE:** On tables with a backrest, leave a little space between the end bumpers and the backrest before tightening to allow movement of the backrest.

Double check that the hinge of the portable table is still aligned over the center alignment groove.

Insert strap into the center of the table. Attach one end of the strap as shown. Hold strap with one hand and with the other hand, slide strap thru the cleat. Then, loop strap gently through the hook behind the cleat.

Pull the strap thru the center of the table and down into the space between the two top parts. Snugly attach the other end of the strap as shown. (Pull down, insert in cleat, pull firmly through cleat, gently loop cord over small hook behind the cleat.)

Try to lift the portable table to check for slack. There should not be much, if any. If it is too loose, retighten portable table secure strap.

**CAUTION**

The table must be secured properly to the base to insure it is safe. Make sure the strap is through the hook behind the cleat.
DIRECTIONS FOR USE

LOADING YOUR PORTABLE TABLE

This is done every time you remove and replace your portable table. All the adjustments to the base do not need to be done again.

STEP 1
Open your portable table on its side.

STEP 2
Remove the shiatsu cables or bolts to enable your table to lay flat. There are different types of shiatsu cables. Follow the directions below based on the type you have. Or follow your table manufacturer’s instructions.

WING NUT
Repeat these steps on both sides of the table. Locations shown above.

WING NUT
Remove the wing nut
Remove wood brace
Remove cable
Replace wood brace and wing nut

C-CLAMP
Repeat these steps on both C-Clamps.

C-CLAMP
C-Clamp closed
Open C-Clamp
Remove Shiatsu cable
Close C-Clamp

CAUTION
Follow your table manufacturer’s instructions for using the Shiatsu option if your table has them.

The instructions shown here are for general reference only.
Follow these steps to place your portable table on top of the ProLuxe Convertible. Make sure you have already completed the “one-time” set up section called “Prepare your ProLuxe Convertible” (page 4-8)

**STEP 3**
With your ProLuxe Convertible at its lowest height, stand at the side where the portable table supports are towards the outside, as shown here.

Have the widest side of the adjustable portable table supports facing you.

**STEP 4**
Lift your portable table onto the ProLuxe Convertible base.

**STEP 5**
Open your portable table so that it is flat and position the bottom away from you.

**STEP 6**
Lower your portable table onto the ProLuxe Convertible base.

---

### CAUTION

Be sure to read and follow the directions on how to center & secure your portable table (shown on page 7) before use.
DIRECTIONS FOR USE

STEP 7
Make sure your portable table fits down and inside the end bumpers of the portable table supports.

STEP 8
Align the hinge of the portable table over the center alignment groove.

STEP 9
Insert strap into the center of the table. Attach one end of the strap as shown. Hold strap with one hand and with the other hand, slide strap thru the cleat. Then, loop strap gently through the hook behind the cleat.

STEP 10
Pull the strap thru the center of the table and down into the space between the two top parts. Snugly attach the other end of the strap as shown. (Pull down, insert in cleat, pull firmly through cleat, gently loop cord over small hook behind the cleat.)

CAUTION
The table must be secured properly to the base to insure it is safe. Make sure the strap is through the hook behind the cleat.

STEP 11
Try to lift the portable table to check for slack. There should not be much, if any. If it is too loose, retighten portable table secure strap.
**REMOVING YOUR PORTABLE TABLE**

**STEP 1**
Remove the portable table secure strap.

**STEP 2**
Lift your portable table off the ProLuxe Convertible base.

**STEP 3**
Reattach your portable table's cabling system to restore your table to a safe operating configuration. Fold your portable table & you’re ready to go!

**CAUTION**
Be sure to secure your portable table’s Shiatsu cables according to manufacturer’s instructions before use.
DIRECTIONS FOR USE - CONTROLS

The ProLuxe Convertible comes with choice of either hand or foot control for easy height adjustments.

CAUTION
When operating the controls and making any and all adjustments to the table, move hands and feet away from the working mechanism of the table.

CAUTION
Children must be supervised when around this equipment by a responsible adult.

CAUTION
When operating the controls be sure to observe all cautions and warnings given in the manual to prevent injury to both operator and client.
USING YOUR PROLUXE CONVERTIBLE - ACCESSORIES

All of your portable table accessories will work with the ProLuxe Convertible. Install according to manufacturer’s instructions.

FACE REST

Shown here with QuickLock™ Face Rest & Boiance™ crescent.

ARM HAMMOCK

Shown here with QuickLock™ Face Rest, Aero-Cel crescent & Arm Hammock.

USING YOUR PROLUXE CONVERTIBLE - APPLICATION

Adjust the height of your table to achieve optimal working height for multiple therapists, clients or treatments without straining your body.

The powerful motor lifts up to 550 lbs. over a 16” height range, and the super stable design insures your clients feel safe.
MAINTENANCE

GENERAL CARE OF EQUIPMENT COMPONENTS

- Use only a mild solution of 4:1 diluted non-alcohol cleaner such as 409®, Fantastik® or some other non-abrasive cleaner to wipe down the metal surfaces. Apply with a damp (not wet) lint-free cloth. Be sure excess liquid does not drip onto, or into, any of the electrical controls or mechanisms. Be sure that the unit is unplugged before cleaning these areas. Wipe these areas carefully with a lint free cloth.
- Electronic and or manual lift mechanisms require no general maintenance or lubrication.
- If the table will be out of use for an extended period of time, the power cord should be unplugged from the receptacle. To prevent inadvertent damage to the plug or cord, the cable should be coiled and secured with a wire tie or rubber band.
- It is important to visually inspect your tale on a quarterly basis to ensure all components are working properly and safely. Be sure to tighten all bolts to be sure they are secure. Over time they may work their way loose, leading to an unsafe condition.
